

## *PENSTEMON GRAHAMII*

---

**Scientific name:** *Penstemon grahamii* Keck  
(common name) Graham penstemon

**Family:** Scrophulariaceae  
(common name) Figwort Family

**Synonyms:**  
None

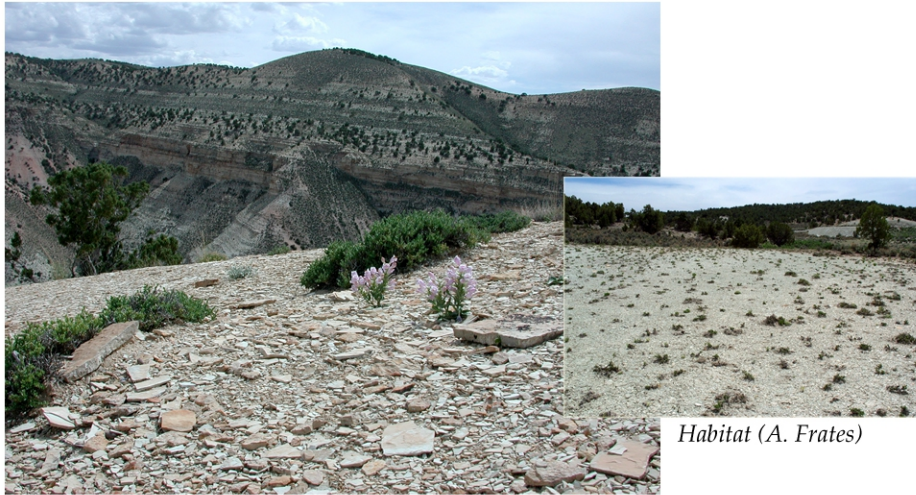

**Global Distribution:**  
Restricted to the Uinta Basin in Carbon, Duchesne, and Uintah Counties, Utah; and in adjacent Rio Blanco County, Colorado

**Land Ownership:**  
BLM - Price and Vernal Field Offices, State Lands, and private

**Habitat:**  
Sparsely vegetated shadscale, *Eriogonum*, horsebrush, ryegrass, and pinyon-juniper communities on shale ledges and talus of the Green River Formation at 4,600 - 6,700 feet elevation, late May - mid-June.

**Comments:**  
Distinct from all Uinta Basin species by the large, deep lavender corollas (25 - 37 mm long) with dark violet lines in the throat, and staminode conspicuously exserted and bearded with golden orange hairs.
